

## Scope

To support IASC decision-makers at headquarter and field levels, the OCHA and partners will stand up a Ukraine crisis Information Management and Analysis Cell (IMAC). The Cell will coordinate, structure, collate, manage and analyze secondary and primary information related to the humanitarian situation, needs and response for the Ukraine Crisis. The Cell will also provide on-demand technical IM and Analysis support and services to the Ukraine field operation. The Cell will be time-bound and operate until the end of May 2022. If required, the mandate can be extended.

## Specific Scope

- Map and analyze existing secondary and primary data from the field and publicly available sources.
- Provide regular humanitarian situation analysis through structured secondary data review.
- Provide IM and analysis support to Ukraine Humanitarian Country Team / Inter-Cluster Coordination Group as required.

## Global Coordination Relationships

The Cell will be hosted and supported by OCHA and provide direct support to the IASC Emergency Directors Group IA Operation Centre for Ukraine. UNHCR will coordinate information management and analysis support for refugees and protection. As required, the Cell will liaise with the Global Cluster Coordination Group.

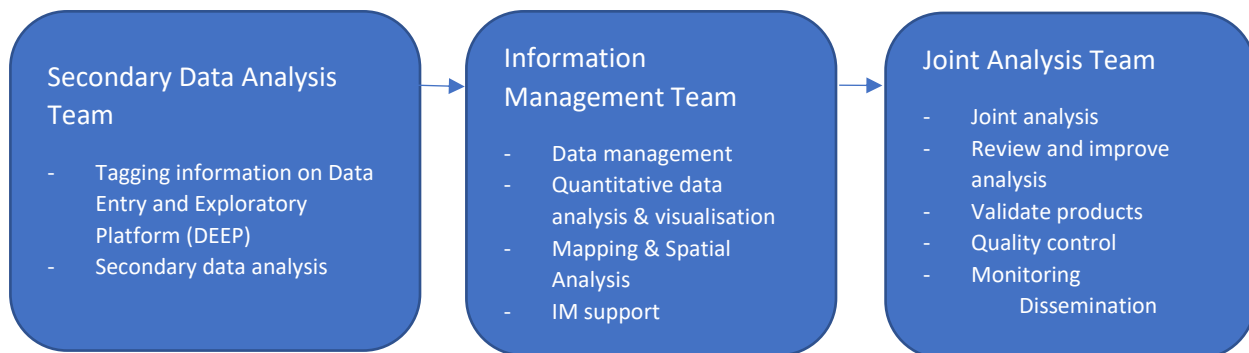

## Analysis outputs

1. Analysis support to inform flash appeals / strategic response plans and their updates.
2. In-country, inter-Cluster coordination to support monitoring and analyzing the situation, needs, impact and response:
  - Displacement, population movement monitoring
  - Overview of crisis Impact: Drivers & aggravating factors, Impact on people, systems and basic services
  - Conflict & access monitoring
  - Estimating severity and PIN
  - Emerging risks and vulnerable groups
  - Current and forecasted priority needs
  - Response and funding monitoring
3. Establishing baseline and monitoring mechanisms such as updating and managing Common Operational Data Sets (CODs), 3W response data and situation and impact monitoring.
4. Situation awareness support to decision-makers such as analysis of the humanitarian situation, impact, needs and response.

## Structure & Main Activities

following activities:

## Support & Services

Product and services	Frequency
The humanitarian situation analysis report	3-4 per month
Secondary data repository export	2 per month
Maps & visualisation products such as 3W, access, situation maps etc.	4-5 per month
Support to ICCG	To be determined

## Resources required

To start the Cell following minimum resources are required.

Teams	Partners	Cost
<b>SDA Team (5)</b>	DEEP / Danish Refugee Council 2xAnalyst, 3XData taggers	90,000 USD\$ - Proposal attached, duration three months
<b>IM Team (3)</b>	1X Information Management and GIS (Requested from interagency partner) 1x GIS & Visualization IMO (OCHA) 1xInformation Management Officer (OCHA)	Seconded for three months
<b>Joint Analysis Team (2)</b>	1x Senior analyst requested to review, improve and validate analysis (Requested from interagency partner)  1X Protection analyst requested to ensure protection lens is integrated into the analysis (GPC/UNHCR)	Seconded for three months
