

Common Operational Datasets CODs

Anila Qehaja & Kristina Mackinnon
July 3, 2020

What type of organization do you belong to?

How familiar are you with CODs?

CONTENTS

- **What are CODs?**
- **What types of CODs are there?**
- **What do they look like?**
- **How are they different?**
- **How are they generated?**
- **Where do I find them?**
- **Why are they important?**
- **When do I use them?**

WHAT ARE CODs?

CODs represent:

- Data sets needed to support operations and decision-making for all actors in a humanitarian response
- The basis for all preparedness and response activities
- Best available data that meet minimum criteria for format and attribute information
- Data sets that have unique identification codes (P-codes)

WHAT TYPES OF CODs ARE THERE?

Geographic Data

- Administrative boundaries (level 0, 1, 2, 3, 4)
- Populated places (settlements)
- Transportation Network (roads, ports)
- Hydrology (streams, water bodies)
- Hypsography (elevation models, contours)
- Health facilities
- Education facilities
- Ports

Linked to Geographic Data

- Population statistics
- Humanitarian Profile (caseload; affected people, people in need)

- MVP datasets

WHAT TYPES OF CODs ARE THERE?

Core CODs

Core CODs provide the demographic and location data.

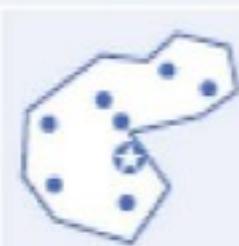

Admin
boundaries

Population
figures

Country-specific CODs

Country-specific CODs consist of other operational data (e.g. roads, typhoon path, IDP camps, checkpoints, demographics, etc).

Populated places

Health facilities

Caseload figures

Roads

Hydrology

Schools

Admin
boundaries

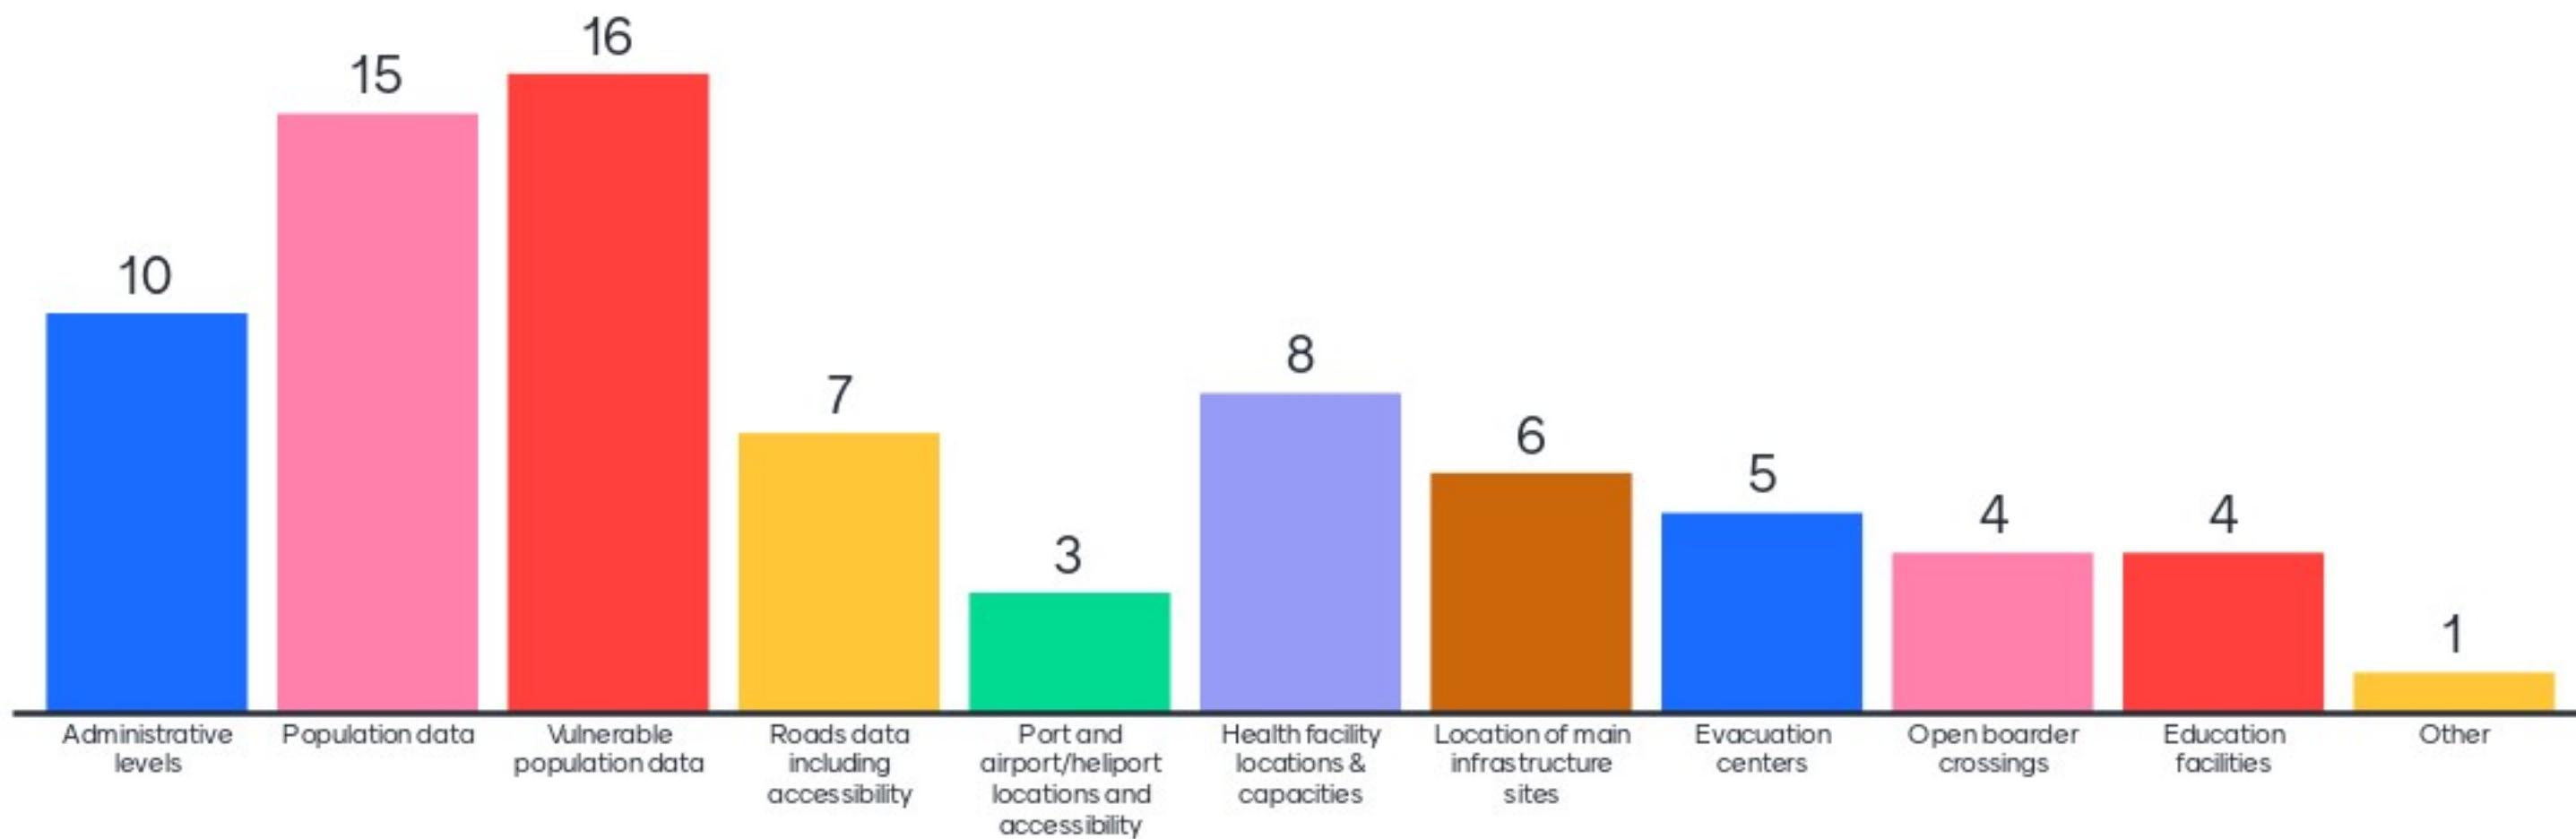

Population
figures

Caseload figures

What are the top three datasets that are the most important to your organization during a response?

Are you familiar with HDX (Humanitarian Data Exchange Platform)?

WHERE DO I FIND THEM?

Humanitarian Data Exchange: <https://data.humdata.org/>

The screenshot shows the HDX homepage with a search bar containing 'mexico'. The results page displays two datasets:

- Mexican administrative boundary polygon level 0 (country), 1 (estado), and 2 ...** by OCHA ROLAC. It has 1800+ Downloads and was updated on February 2, 2018. The dataset provides administrative population statistics tables suitable for linking to Mexican administrative boundary polygons.
- Mexican population statistics for administrative level 0, 1, and 2, and popul...** by OCHA ROLAC. It has 1200+ Downloads and was updated on January 26, 2018. The dataset provides populated places population statistics.

The interface includes navigation tabs for DATA, LOCATIONS, ORGANISATIONS, and QUICKLINKS (the latter is circled in red). A sidebar on the left lists various dataset categories like CODs, Sub-national, Geodata, etc. The top navigation bar includes links for OCHA Services, account optimization, Data Responsibility for COVID-19, FAQ, user profile, and log out options.
